

We help staffing firms fill more orders, faster

Redline Growth is an onshore GTM Engineering services firm.

We build customized intelligence engines that surface the accounts ready to hire and the talent ready to move, scored on fit and timing, ready to act.

Solutions orchestrate and integrate a wide array of automation and AI tooling to deliver the right insights to both desks within the systems and workflows they already use.

We deliver the intelligence, your desks work the accounts and place the talent.

SIGNAL DETECTION · ENRICHMENT · TIMELY CONTEXT · OUTREACH

5x

More likely to win the req by reaching the manager first
Forrester

30%

Of desk time lost to searching, not placing
Staffing benchmarks

2x

Win rate, signal-triggered vs cold outreach
Champify 2025

VALUE AT EACH PHASE, COMPOUNDED AS A COMPLETE ENGINE

01 · DETECT

Signals that an account is about to hire.

A custom signal taxonomy watches both sides of your market for the accounts ready to hire and the talent ready to move, before the rest see them.

02 · TRANSLATE

Signals turned into a brief your desks can act on.

Each signal is scored on fit and timing, then assembled into the context a recruiter or BD needs: who, why now, and the warm path in.

03 · ACTIVATE

Delivered into the tools your desks already use.

The intelligence lands with the right desk inside your ATS and CRM. No new platform or tool to learn.

BUILT FOR THE RELATIONSHIP-BASED, LEADER-LED DESK ENVIRONMENT

Every firm can buy the same boards and lists. Few can turn them into the timing and fit that fills the order before the market floods it.

LEAVES A GAP

Job boards and list tools

They sell you postings and contacts. You still do the sourcing, the scoring, and the timing. Every competitor works the same boards.

LEAVES A GAP

Offshore sourcing and RPO

It adds volume on contract, not a system. Off-brand for a relationship-led desk, and nothing durable is left behind.

MEETS THE CHALLENGE

Redline Growth

An onshore service pairing GTM engineering with staffing operating experience. We build the two-desk signal system and run it for you, so desk hours land where orders fill and pay.

TWO WAYS TO WORK TOGETHER

PROJECT BASED

A fixed-scope intelligence asset

A defined deliverable: a scored account target map, a talent map, or an assessment. Yours to use inside your ATS and CRM. Scoped and priced per engagement.

Tier 1: 2 to 4 weeks · Tier 2: 4 to 10 weeks

From \$5,000 PER ENGAGEMENT

SUBSCRIPTION BASED

The live engine for both desks

The Detect, Translate, Activate cycle run continuously on both desks, tuned by a dedicated GTM engineer, delivering scored accounts and talent on a regular cadence.

Pilot: 4 to 6 weeks to stand up · subscription extends only on proof of value

From \$10,000 PER MONTH

Indicative. Subscription pricing is banded to your desks and gross profit.

Grow Pipeline, Not Headcount
