

We help SaaS revenue teams grow quality pipeline

Redline Growth is an onshore GTM Engineering services firm.

We build customized intelligence engines that deliver timely and relevant account insights and contact-level information that revenue teams can act on immediately.

Solutions orchestrate and integrate a wide array of automation and AI tooling to deliver the right insights to reps within their existing systems and workflows.

We deliver the intelligence, your teams focus on the engagement with customers.

SIGNAL DETECTION · ENRICHMENT · TIMELY CONTEXT · OUTREACH

47% Better conversion vs traditional lead scoring
Landbase

2x Win rate, signal-triggered vs cold outreach
Champify 2025

70% Of sellers overwhelmed by their tool stack
Gartner

VALUE AT EACH PHASE, COMPOUNDED AS A COMPLETE ENGINE

01 · DETECT

Signals that predict buyer intent in your world.

A custom signal taxonomy, built for your ICP, watches your market for the buying signals that precede a purchase. Not category-level intent sold to your competitors.

02 · TRANSLATE

Signals turned into rep-ready intelligence.

Each signal is scored against account and contact fit, then assembled into the context a rep needs to act: who, why now, and what to say.

03 · ACTIVATE

Routed into the workflow reps already use.

That intelligence lands with the right rep inside your existing tools and CRM. No new platform to learn, no dashboard to check.

BUILT FOR FLEXIBILITY, TAILORED FOR EACH SITUATION

Every team can buy the same static data and tools. Few can make them produce the differentiated intelligence that positively impacts how reps sell.

LEAVES A GAP

Off-the-shelf software

Platforms sell raw data and licenses. You still architect it, staff it, and make it work. Every competitor buys the same data.

LEAVES A GAP

Offshore SDR-AI

Outsourced sequences buy activity, not infrastructure. Nothing durable is left behind, and your brand carries the risk.

MEETS THE CHALLENGE

Redline Growth

An onshore managed service run by proven sales and GTM operators. We build the signal system and run it for you, producing intelligence in weeks, not quarters.

TWO WAYS TO WORK TOGETHER

PROJECT BASED

A fixed-scope intelligence asset

A defined deliverable using the Detect, Translate, and Advisory modes. The work product is yours to use inside your CRM, outbound platform, or sales workflow. Scoped and priced per engagement.

Tier 1: 2 to 4 weeks · Tier 2: 4 to 10 weeks

From \$5,000 PER ENGAGEMENT

SUBSCRIPTION BASED

The live engine in your workflow

The Detect, Translate, Activate cycle run continuously, tuned across the engagement by a dedicated GTM engineer, with weekly strategy. Intelligence reaches your reps every week.

Pilot: 4 to 6 weeks to stand up · 4 to 6 months to measurable growth

From \$10,000 PER MONTH

Grow Pipeline, Not Headcount
